

Instant Roof

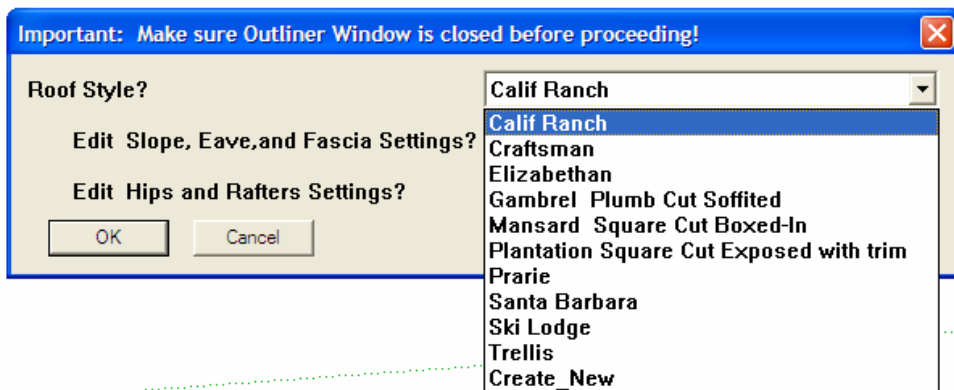

QuickStart Simple Gable Roof

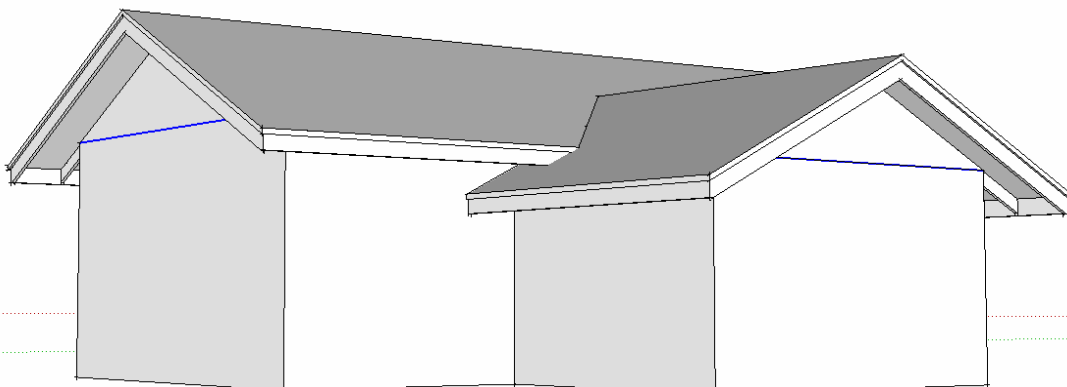

1. Draw a box or several attached boxes.
2. Select the top face or faces and edges where the gable ends are to occur. Here I selected three edges.

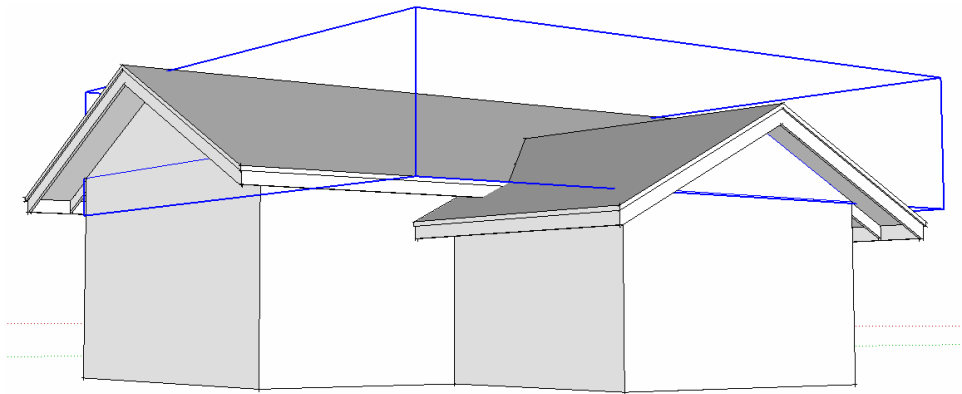

3. Choose “**Plugins/ Instant Roof/ Make Roof**”. In the pop-up menu, then choose “**Calif Ranch**” from the “**Roof Style?**” pull down menu.

4. Choose “**OK**” to accept default parameters and generate the roof. The script should draw something like this:

5. Right-click one of the gable walls and select "**Explode**" from the pull down menu. This will explode the group containing the gable walls.

6. With the eraser tool, erase the edges between the lower walls and gable walls. The roof should look something like this:
